

## G2-M2-Topic A

G2-M2-L1: Many of the app problems in this module show 10-stick drawings as well as tape diagrams. Consider having Ss model tape diagrams as an extension if they first model the ten-stick drawing.

G2-M2-L2: Throughout this module, select Sprints based on Ss levels rather than the module recommendations. Any time a sprint-able skill is mastered the same day as the lesson, Sprint it the next day.

G2-M2-L3: If you face time constraints, reduce time by creating the cm ruler for the students or have them create it at a different time of the day.
