

## G2-M5-Topic C

G2-M5-L13-17: Scaffold these lessons by providing analogous sample problems within 200 to bridge to bigger numbers, e.g.  $163 - 70$ ,  $863 - 70$ ,  $863 - 170$ ,  $172 - 28$ ,  $472 - 28$ ,  $472 - 228$

G2-M5-L18: A topic wrap-up day might be time better spent than teaching this lesson. If that choice is made, then this problem set could be an extension for those who have already mastered the algorithm.
