G4-M1-Topic D

G4-M1-L11: Although only 2 days are devoted to Multi-digit Whole Number Addition, the topic is valuable enough to use up to 5 instructional days. Prepare extension work, a project, etc. for early finishers and concentrate teacher energy on students who haven't yet mastered the algorithm.

G4-M1-L12: Solving word problems for longer than 15-20 mins can be exhausting for students. Instead of following the concept development to a T, consider providing algorithm calculations for 10 minutes & word problems for 10-15 minutes.
