G5-M4-Topic C

G5-M4-L6: Manage time so that all students get to #2 of the Problem Set. It's vital for them to create their own models in order to solve.

G5-M4-L7: For students who struggle with simple computation, consider providing Fraction of a Set problems with single-digit numbers. Also, consider teaching students to organize their work with this format:
- 5 units = 15
- 1 unit = 3
- 2 units = 6

G5-M4-L8: For the Application Problem – remediate by changing the new pieces to 12. Extend by changing the new pieces to 48.

G5-M4-L9: This Problem Set could serve as an extension for students who have already mastered lesson 6-8 content.
