

G5-M5-Topic D

G5-M5-L16-19: In the days leading up to this lesson, consider providing students with practice drawing obtuse, acute, & right angles. These component skills will help during the concept development.

G5-M5-L16-20: During Geometry lessons, bolster fluency to ensure students are getting ample practice to build their number sense.

G5-M5-L16-20: Spend no more than 5 days with these 5 lessons. If behind in pacing, try to consolidate the lessons into 3 or 4 days.

G5-M5-L21: If behind in pacing, omit this lesson. Provide the Problem Set as an extension earlier in the topic, or deliver it during a station rotation.
